What is SwimCloud.com?

The website CollegeSwimming.com was founded in 2000 in an effort to promote college swimming and diving programs. Over time, the company not only grew beyond not just college, but also evolved into more than just a website. SwimCloud reflects this growth and works to develop software and tools for the swimming community.

SwimCloud powers websites like CollegeSwimming and PrepSwimming, is a data provider for hundreds of teams, conferences and associations, and a provider of membership solutions for swimming organizations. At heart, though, we are still just swimming fans hoping to help promote this great sport and the teams and people who make it up.

Why SwimCloud.com?

- SwimCloud will keep an accurate database of results and individual times.
- As soon as results are uploaded the times are updated and individuals can see the top times
- Upload meet information (general info, results, etc)
- Give your swimmers exposure to college coaches.
- Gives swimmers a chance to compare themselves to other swimmers in the conference, region, state, nation and the world.
